Project Design Phase
Problem – Solution Fit Template

Date	22 October 2026
Team ID	SWUID2026403471
Project Name	IMovies – Movie Ticket Booking Website
Maximum Marks	2 Marks

Problem – Solution Fit Overview:

The Problem–Solution Fit ensures that the IMovies platform addresses key gaps in the movie ticket booking experience and aligns with the real needs of moviegoers and theatre administrators. This validation is critical before scaling the platform.

Purpose:

- Bridge the gap between moviegoers who want quick, hassle-free ticket booking and theatres that need to manage shows and seat availability.
- Offer a unified platform that handles the booking lifecycle—from browsing movies to receiving an e-ticket—without queues or multiple apps.
- Enable secure online payments and timely refunds to build trust.
- Provide real-time seat availability so that no seat is double-booked.
- Improve the booking experience through easy search and filters, ratings and reviews, and a simple step-by-step booking flow.

Problem Statement:

Many moviegoers and theatres face challenges such as:

- Long queues and wasted time at theatre box offices
- Difficulty finding movies, showtimes and theatres in one place
- Uncertainty about seat availability and the risk of double booking
- Insecure or failed payments and delayed refunds on cancellation
- Paper tickets that can be lost, and no reliable reviews to help choose a movie
- No simple, centralized tool for theatres to manage movies, shows and bookings

Solution:

IMovies, a modern full-stack (MERN) movie ticket booking website, offers:

- Browsing of Now Showing and Upcoming movies with search and filters by language, genre and rating
- Theatre, showtime and interactive seat selection with real-time availability and a temporary seat hold
- Secure online payment through UPI, cards and net banking, with coupon and offer support
- Instant e-ticket with QR code sent by email/SMS
- Easy cancellation with refund to the original payment method, and booking history in the user profile
- Ratings and reviews from users who have booked a movie
- Admin panel to manage movies, theatres, shows, ticket prices, coupons and sales reports
