Proposed Solution for IMovies

S. No.	Parameter	Description
1	**Problem Statement (Problem to be solved)**	Many moviegoers face long queues at box offices, scattered information about movies and showtimes, uncertainty about seat availability, insecure payments and delayed refunds. Theatres also lack a simple central system to manage shows and bookings. This leads to wasted time, double bookings and dissatisfaction.
2	**Idea / Solution Description**	IMovies is a full-stack MERN web application (React frontend + Node.js/Express backend + MongoDB) that lets users browse movies, choose a theatre, show and seats, pay securely online and receive an e-ticket with a QR code instantly. An admin panel helps theatres manage movies, shows, prices, coupons and reports.
3	**Novelty / Uniqueness**	• Interactive seat map with real-time availability and a temporary seat hold to prevent double booking • Smart search and filters by language, genre, rating and format • Instant QR e-ticket sent by email/SMS • Easy cancellation with automatic refund to the original payment method • Ratings and reviews from verified bookers
4	**Social Impact / Customer Satisfaction**	• Saves time by removing the need to queue at the theatre • Paperless e-tickets reduce paper waste • Helps theatres reach more audiences and improve seat occupancy • Transparent ratings and reviews help users choose movies • Safe, cashless and convenient booking from anywhere
5	**Business Model (Revenue Model)**	• Convenience fee on each ticket booked • Commission from theatres on every successful booking • Advertising and sponsored promotions for upcoming movies • Partner offers and premium membership with discounts and early-access booking
6	**Scalability of the Solution**	• Expandable to multiple cities, multiplexes and languages • Cloud hosting (e.g., MongoDB Atlas) to handle peak traffic on big releases • Mobile app support in future using React Native • Modular architecture for quick addition of features like food ordering, movie recommendations, event ticketing and more payment options
